**UNIT 3A HAYLE INDUSTRIAL PARK, HAYLE, CORNWALL, TR27 5JR**

- Founded in East Germany in 1917 KABE is one of the oldest manufacturers of stamp albums in the world. The original philosophy of the founders Herr Koch (KA) and Herr Bein (BE) 'The best or nothing' has remained to this day, establishing KABE as a true leader in quality and workmanship throughout Europe.
- Every KABE country album page is individually re-enforced with linen hinged strips, not only strengthening the page at its most stressed point but eliminating the need for unsightly hole punching or perforating which also allows the KABE page to lie absolutely flat when the album is opened.
- Each stamp is illustrated and a clear stamp mount is affixed to the page offering your stamps complete protection.
- This brochure is a smaller version of the full Kabe product range.
- Prices are valid from June 2009

## KABE Great Britain Album

- The fully revised KABE Great Britain album now includes even more detailed coverage of Decimal Definitive issues, using the Stanley Gibbons Concise catalogue for guidance the KABE Great Britain not only offers one of the most comprehensive albums for the GB collector, but also superb quality.
- For specialist collectors supplementary pages ref 01DS/1 & OFDS/2 are available covering 'Machins' with gum printing, partial imperforates from booklets, booklet panes with commemorative labels, blue fluorescence and new image (EME).
- Added to this the superb quality of KABE double linen hinged pages, printed to the highest quality, plus crystal clear stamp mounts already affixed to the page, the KABE Great Britain album is hard to match.

## Country Order ref pages only

# WATERMARK DETECTORS

## Morley-Bright watermark Detectors

A Watermark Detector can increase the value of your stamp collection. Watermark 'varieties' have changed the values of some stamps from a few pence to hundreds or even thousands of pounds. Not surprisingly there is increasing interest in watermarks. A Great Britain definitive stamp (SG606), on an envelope, was sold at auction by one of our customers for £2300. Why so much? It had the 'wrong' watermark – a St Edwards Crown instead of a Multiple Crown. The same customer found the identical watermark error on a block of mint stamps and sold these for several hundred pounds each.

The stamps of most countries have at some time been watermarked. Some watermarks are clearly visible but in most cases you will not be able to identify them without a watermark detector. The paper is thinner in the area of the watermark; with a watermark detector this area appears darker against the lighter background of the stamp paper.

The Inst-a-tector is our best selling watermark detector, used by dealers and collectors for the rapid checking of stamps. It is efficient for general worldwide use. Stamps can be mint or used. This watermark detector can be used for single stamps or blocks with a maximum overall size of 35x42mm.

The Roll-a-tector can find the watermarks of stamps that are still on postcards, envelopes or paper. It is efficient for difficult watermarks and general worldwide use. As the image of the watermark remains until the next stamp is inserted, this watermark detector can be used for studying a watermark or making comparisons. Any size can be checked.

Finding just one watermark variety may repay your investment in a watermark detector. The SG606 stamp is very common and usually worth very little; fortunately for our customer he checked the watermark. Are you sure you know the value of the stamps in your collection?

**Morley-Bright Inst-a-Tector £15.95**

**Morley-Bright Roll-a-Tector £15.95**

**We are one of the UKs leading suppliers of Stamp, Coin, Banknote and Postcard collecting accessories. We stock items from all of the industries biggest brands including Kabe, Lighthouse, Prinz, Lindner, Stanley Gibbons, Safe, Schaubek, Michel, Philex.**
